**CAUTION:** External Message

Dear School Board Chairs, Directors, and Trustees,

Attached, please find a news release and [presentation](#) prepared by the Canadian Covid Care Alliance (CCCA), which explains how Ontario's own COVID-19 data demonstrates that the COVID-19 vaccines and related mandates and passports are ineffective at controlling COVID-19 case growth and eliminating COVID-19 hospitalizations. The data also clearly shows that the COVID-19 pandemic is effectively over.

Ontario's own data shows that:

- COVID-19 no longer qualifies as a pandemic as there is evidence of population level immunity; additionally, the disease is no longer lethal to the large majority of Ontarians;
- Omicron is highly infectious and not prevented by current vaccines. There is therefore little to no benefit to using these injections to "vaccinate" children or boost adults;
- The unvaccinated are not driving infection, and it is time to end all discriminatory policies including vaccine mandates and passports;
- It is time to end the exclusive focus on vaccines and broaden our management approach to COVID-19 by acknowledging natural immunity and focusing on early treatment; and,
- It is time to uncouple health policy from politics and allow independent emergency management professionals to implement a plan that leads all aspects of society back to normal life.

We invite you to review other evidence-based scientific articles on our website: [www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org), and we welcome your questions. Note that we have also included a [scientific paper](#) with more detailed information related to the presentation.

Sincerely,

David Ross, FCPA FCA  
President, Canadian Covid Care Alliance

on behalf of Canadian Covid Care Alliance members
